Experience

Frontend Developer Internship (01.04.2026 ~ 30.06.2026)

ABank PCL

- Learned React, TypeScript, and Redux Toolkit
- Built a personal portfolio website and contributed to an ongoing expense tracker project.
- Gained practical exposure to banking domain knowledge through guidance from senior developers.
- Improved understanding of frontend development workflows, code structure, and team collaboration.

Projects

● DailySuite (Productivity Web App)

Web Development with Python Project

- Built a task management and productivity system with dashboard features
- Implemented search, filtering, and dynamic UI components
- <https://dailysuite.onrender.com>
- GitHub - <https://github.com/yinnyeinhtwe/dailysuite>

● Personal Portfolio Website

- Developed a fully responsive personal portfolio website with a modern and user-friendly interface.
- Implemented scroll animations, an interactive project carousel, and a tabbed skills section.
- Integrated an AI chatbot using the Groq API (LLaMA 3) to answer visitor questions in real time.
- Connected a contact form via Formspree and deployed the website with a custom domain.
- <https://yinportfolio.netlify.app/>
- GitHub - <https://github.com/yinnyeinhtwe/Yin-s-Portfolio>

● UNLOCKING CAFE SALES WITH DATA VISUALIZATION

Data Mining and Warehousing Project

- Analyzed transaction records to identify sales trends and customer behavior
- Created dashboards and visual reports (charts, graphs, KPIs)
- Applied Naïve Bayes for pattern analysis and insights generation
- Tools: Power BI, Data Mining Techniques

● Tour and Travel Booking Management System

Design and Architecture of UML Project

- Built a UML-based platform for booking tours, flights, hotels, and transportation.
- Integrated secure payments, automated notifications, and travel agency package management.
- Added features for local tours, guides, and additional travel services.

● YBS Bus Tracking Management System

Database Transactions Management Project

- Developed a MySQL-based system to track buses in real time with estimated arrival times and route details.
- Implemented user management (add/update/delete users, change password) and driver age verification.
- Designed ER diagrams, created tables, and supported queries for buses, routes, and upcoming stops.
